

Sketching software

AreaSketch™

New generation sketching tools designed for field professionals

Time is money!

AreaSketch™ helps you save both time and money. No other sketcher allows you to finish your sketch assignment quicker than AreaSketch.

Designed for field professionals

Designed specifically for appraisers, AreaSketch stands alone when compared to existing sketch solutions.

- ▶ FreeForm Technology™ lets you draw any sketch as data is being gathered and create new areas on the fly without having to finish the first area
- ▶ Bi-Directional drawing – switch drawing directions
- ▶ FreeForm Annotation – place a label or other type of annotation quickly and easily
- ▶ Line Editing – line dimensions may be edited at any time with point & click simplicity
- ▶ Calculator functions are included to allow the addition or subtraction of any value from an existing line to properly close the area
