

Get a professional business website fast and at a great discount.

Not a graphic designer or web programmer? Bradford Technologies' Website Builder is your best solution for a sophisticated website made simple.

Website Builder offers you a custom business website with hundreds of design options to create a unique appraisal storefront without spending too much money. In 15 minutes, you can easily build a sophisticated appraisal website that allows you to put your business on the web and take orders online.

Low-cost marketing

You'll create a unique and impressive professional appraisal storefront for hundreds, rather than thousands, of dollars to market your business 24/7.

Quick and easy setup

Build your sophisticated business website quickly in only six easy steps! Regardless of your technical expertise, our online website builder software allows you to create your own website faster — in minutes rather than days. Specify your own domain name, such as "Appraiser.com", and we'll register it for you. Plus, you'll get up to 20 email accounts associated with it.

Receive orders online

Easily increase your business by taking orders online via your business website. An online appraisal order form is included in your site for free, so customers can place orders at any time.

Many design options

Choose from hundreds of layouts, colors, and text that contains professionally prewritten content targeted to appraisers. You can also add your own web pages as well as your company logo and photographs.

Spam blocker

Your site features built-in spam filtering, so you can focus on your business rather than sorting through annoying junk mail.

Statistics tracking

Easy-to-view Web Traffic Analysis graphs show you who is visiting your site. See how many "hits" you've gotten and when, so you can see how well your website is working for you.

No downtime

Your business website is backed up in several different data centers, so your website is always accessible by your customers. Always.
